poppet

poppet valve for internal combustion engine. (From Baumeister, ed., Standard Handbook for Mechanical Engineers, 7th ed., McGraw-Hill, 1967)

POPPY

flower and leaves of the opium poppy (*Papaver somniferum*).

PORCUPINE

preceded by a nonlinear component characterized by an input-output function $N(\cdot)$, with a unity gain feedback loop surrounding the series connection.

poppet [ING CIV] *colonna di innescatura* One of the timber and steel structures supporting the fore and aft ends of a ship for launching from sliding ways. [PROG MECC] *sfera di arresto; s. di scatto* A spring-loaded ball engaging a notch; a ball latch. [ING MIN] *cassetto* A pulley frame or the headgear over a mine shaft.

• **poppet valve** [ING MECC] *valvola a fungo* A cam-operated or spring-loaded reciprocating-engine mushroom-type valve used for control of admission and exhaust of working fluid; the direction of movement is at right angles to the plane of its seat.

popping [ING MIN] *patarraggio; abbattimento secondario* Explosive removal of a quarry or opencast mine.

popping pressure [ING MECC] *pressione di apertura della valvola di sicurezza* In compressible fluid service, the inlet pressure at which a safety valve disk opens.

• **poppy** [BOT] *papavero* Any of various ornamental herbs of the genus *Papaver*, family Papaveraceae, with large, showy flowers; the opium is obtained from the fruits of the opium poppy (*P. somniferum*).

poppy oil [MATER] *olio di papavero* Golden-yellow drying oil with pleasant taste and aroma; soluble in carbon disulfide, ether, and chloroform; expressed from poppy seeds, especially of the opium poppy; used as a food oil; in artist's colors, soaps, varnishes, and lubricants. Also known as poppy-seed oil.

poppy-seed oil - *V.* poppy oil.

pop shot - *V.* pop.

population [BIOL] *popolazione* A group of organisms occupying a specific geographic area or biome.

Population I [ASTRON] *popolazione I* A class of stars which are relatively young, have relatively low peculiar velocities, and are found chiefly in the spiral arms of galaxies.

Population II [ASTRON] *popolazione II* A class of stars which are relatively old and evolved, have low metallic content and high peculiar velocities from 100 to 500 kilometers per second, and are found chiefly in the spheroidal halo of a galaxy.

population covariance [STAT] *covarianza della popolazione* The number $(1/N) \sum_{i=1}^N (v_i - \bar{v})(w_i - \bar{w}) + \dots + (v_N - \bar{v})(w_N - \bar{w})$, where v_i and w_i , $i = 1, 2, \dots, N$, are the values obtained from two populations, and \bar{v} and \bar{w} are the respective means.

population dispersal [BIOL] *dispersione della popolazione* The process by which groups of living organisms expand the space or range within which they live.

population dispersion [BIOL] *dispersione della popolazione* The spatial distribution at any particular moment of the individuals of a species of plant or animal.

population dynamics [BIOL] *dinamica di popolazioni* The aggregate of processes that determine the size and composition of any population.

ware, in contrast to ordinary porcelain.

porcelainite - *V.* mulite.

porcelaneous [GEOL] *porcellane*
